MOHD ZAID

Senior React Native Developer & Tech Lead | 6+ Years Experience

+91 74175 37175 | mzaid6961@gmail.com | mohdzaid-dev.github.io | LinkedIn | Meerut, India

Nationality: Indian | Notice Period: 15 days or less | Open to Relocate

PROFESSIONAL SUMMARY

Tech Lead and Senior React Native Developer with 6+ years of experience building high-scale cross-platform mobile and web applications. Led engineering for OTTPlay — one of India's largest React Native OTT deployments — scaling it to 300K+ daily active users with a 99.7% crash-free rate. Architected PayPenny, a cross-border FinTech platform (India–Canada) from scratch, processing 1,000+ daily transactions with full KYC compliance. Built and launched DeckShot, a self-funded monetised interview preparation app on Google Play Store with per-topic Razorpay payments, AES-256 encrypted offline mode, and React Native New Architecture. Deep expertise in React Native New Architecture (Fabric, TurboModules, JSI), React JS (Micro Front-End, SSR/CSR), TypeScript, Redux Saga, payment gateway integration (Apple Pay, Google Pay, Razorpay, Juspay), and KYC workflows (ONFIDO, PLAID).

SKILLS

Mobile: React Native, React.js, TypeScript, JavaScript ES6, Swift, Kotlin, iOS, Android

RN New Architecture: Fabric Renderer, TurboModules, JSI (JavaScript Interface), Hermes Engine, Codegen, React Native 0.7x+

React Web: React JS, Micro Front-End (Module Federation), SSR, CSR, Webpack, Babel, SASS/LESS, Flexbox, CSS Grid

State Management: Redux, Redux Saga, Redux Thunk, Zustand (AsyncStorage persistence), React Context API

Backend & APIs: Node.js, Supabase (PostgreSQL, RLS, Edge Functions), RESTful APIs, GraphQL, MongoDB, 300+ API integrations

Security & Offline: AES-256-CBC Encryption, PBKDF2 Key Derivation, Encrypted AsyncStorage, Offline-first Architecture

Testing: Jest, Playwright, React Native Testing Library

UI & Design: Figma, React Native Reanimated v3, Component Libraries (React Native Paper, NativeBase, MUI), Accessibility (WCAG AA)

Cloud & DevOps: AWS EC2, AWS S3, Firebase, Supabase, CI/CD Pipelines, Git, Agile, Scrum

Payments & FinTech: Apple Pay, Google Pay, Razorpay (gateway + webhooks), Paytm, Juspay, Cross-border Payments

KYC & Identity: ONFIDO SDK, PLAID SDK, Secure KYC Onboarding, Document & Video Verification

EXPERIENCE

Senior React Native Developer & Tech Lead Jan 2021 – Present

HT Media Labs (via Neosoft Technologies) · Mumbai, India

- Led a 9-member engineering team to scale OTTPlay to 300K+ Daily Active Users, achieving a 5x increase in subscriptions and downloads.
- Maintained 99.7% crash-free sessions across iOS and Android by bridging React Native with native Swift and Kotlin modules for high-performance video playback.
- Architected a secure FinTech ecosystem for PayPenny, integrating Plaid and Onfido SDKs to facilitate 1,000+ daily cross-border transactions with full KYC compliance.
- Streamlined global payment journeys by 60% through integration of Razorpay, JusPay, Apple Pay, and Google Pay, ensuring zero retention of sensitive PII data.
- Implemented offline data persistence using Realm Database and optimised 300+ API endpoints using React Context and Redux Saga.
- Enforced Accessibility AA (WCAG) standards across mobile UI components, ensuring compliance for a diverse user base.
- Managed project delivery using JIRA and Confluence, coordinating sprint planning, epics, and acceptance criteria with product and design stakeholders.

Lead Mobile Engineer Jun 2020 – Dec 2020

SheThink Pvt Ltd · Indore, India

- Acted as founding engineering lead in a 7-member team, driving scalable product delivery during the company's early growth phase.
- Engineered 'Omnify Go' from MVP to production launch, improving UI performance by 50% using React Native Reanimated and native-driver animations.

- Built a complex multi-user meeting engine with eligibility logic and real-time host/member participation tracking.
- Reduced memory overhead by architecting a custom pagination and chunking strategy for heavy API data consumption via Redux Thunk.
- Deployed cross-platform push notifications using Firebase Cloud Messaging (FCM) to establish the app's retention system.
- Managed task workflows and sprint delivery using ClickUp, ensuring timely milestone completion across the team.

PROJECTS

DeckShot — Solo Developer 2025 – Present

Interview Prep · FinTech · Android | deckshot.in | Google Play Store | React Native New Architecture · Supabase · Razorpay

- Built and launched a self-funded monetised interview preparation app on Google Play Store with 500+ curated questions from real interviews at Google, Flipkart, Razorpay, and Zomato.
- Adopted React Native New Architecture (Fabric + TurboModules) — Fabric renderer enables synchronous C++ UI updates eliminating shadow thread overhead; TurboModules provide lazy-loaded native module initialisation reducing cold start time.
- Leveraged JSI (JavaScript Interface) to replace the legacy async JSON bridge — direct synchronous C++ ↔ JS communication eliminates serialisation overhead for gesture callbacks and Razorpay payment events.
- Implemented React Native Reanimated v3 Worklets for all card swipe animations — gesture handlers and animations execute entirely on the UI thread with zero JS thread dependency, maintaining 60fps under heavy JS load.
- Enabled Hermes engine — reduced JS bundle parse time, lower memory footprint, and improved TTI (Time to Interactive) on Android; Codegen used for type-safe compile-time verification of JS ↔ native contracts.
- Integrated Razorpay payment gateway with per-topic one-time purchase model; Supabase Edge Functions handle order creation and webhook verification server-side — preventing client-side unlock manipulation.
- Architected Supabase PostgreSQL backend with Row Level Security (RLS) — per-user data isolation enforced at the database level, not the application layer, eliminating an entire class of data leakage vulnerabilities.
- Built AES-256-CBC encrypted offline storage with PBKDF2 key derivation (5,000 iterations) — question data remains unreadable even if AsyncStorage SQLite file is extracted from device storage.
- Implemented Zustand with AsyncStorage persistence middleware for auth tokens and user state; per-topic question store uses append-only pagination with prefetch at card 28 ensuring zero loading gaps.
- Engineered dual-gate splash screen — native splash transitions to animated JS splash only when both API data fetch and animation sequence complete simultaneously, preventing blank state flicker on launch.
- Added PostgreSQL trigger function for subscription management — automatic cascade deletion of user progress when a topic unlock is removed, enforced at database level without application-layer logic.

OTTPlay — Lead React Native Developer Feb 2022 – Present

OTT · Streaming · iOS & Android | www.ottplay.com | HT Media Labs (via Neosoft Technologies)

- Scaled a high-traffic OTT platform to 300K+ Daily Active Users, leading a 9-member engineering team.
- Achieved 99.7% crash-free sessions via native-level Swift and Kotlin optimisations for high-performance video playback.
- Engineered 5x subscription growth through a seamless multi-gateway payment flow (Razorpay, JusPay, Google Pay, Apple Pay).
- Built an offline download module similar to Netflix using Realm Database for local data persistence.
- Integrated Google Analytics and MoEngage for data-driven product decisions across 300+ API endpoints.
- Implemented Micro Front-End (MFE) architecture for the OTTPlay web platform, enabling independent deployment of feature modules and improving CI/CD throughput.
- Ensured WCAG AA accessibility compliance across critical UI flows and applied CSP (Content Security Policy) headers to strengthen web security posture.
- Utilised Webpack and Babel for module bundling and build optimisation, reducing bundle size and improving load times.
- Wrote unit and integration tests using Jest and Playwright, maintaining a stable test suite across web and mobile deliverables.

PayPenny — Lead React Native Developer Aug 2021 – Jan 2022

FinTech · Cross-border Payments · India–Canada | Affle (via Neosoft Technologies)

- Architected a cross-border remittance platform for India–Canada transactions, leading a 4-member engineering team.
- Optimised payment journey by 60% by streamlining transaction flows and integrating high-performance SDKs.
- Integrated Onfido SDK for automated document verification and video-based KYC onboarding.
- Engineered secure fund transfers via Plaid SDK with encrypted communication to prevent data leakage.
- Scaled system to process 1,000+ daily transactions using Redux Saga for complex async state management.

Omnify Go — React Native Developer Jun 2020 – Jun 2021

Fitness · E-commerce · Events | SheThink Pvt Ltd

- Improved app performance by 50% through high-performance UI animations using native-driver optimisations.
- Built multi-user meeting management logic including host/member eligibility and real-time participation tracking.
- Architected scalable data handling for heavy API payloads using efficient pagination and chunking strategies.

EDUCATION

Bachelor of Technology in Computer Science Engineering Jul 2017 – Jun 2021

Graphic Era University, Dehradun, Uttarakhand, India

Relevant Coursework: Data Structures & Algorithms · Mobile Computing · Software Engineering · DBMS

LANGUAGES

English (Professional Working) · Hindi (Full Professional)
